

CLOUD-POWERED PLM. SECURE, SCALABLE, FLEXIBLE.

Ensure your Cloud environment meets the integration, capability and performance needs of your business, with a fully flexible approach.

Do these challenges sound familiar?

- Striving for a tailored PLM Cloud solution, but complex, legacy systems blocking your migration?
- Managing complicated and interlocking processes that increase time to market and decrease efficiency?
- Struggling to introduce greater agility without compromising security?
- Choosing between On-premise or On-cloud PLM when your business needs a hybrid solution?

Do you want to achieve the following?

- Increased agility whilst still maintaining control over systems, processes and data
- Customisable PLM tools that are geared towards your business' needs and technology requirements
- Ability to scale thanks to a seamless integration of Cloud technology

TECHNIA.CLOUD: PUTTING YOU IN CONTROL OF YOUR CLOUD PLM PLATFORM

TECHNIA.Cloud is more than just another PLM solution. It is a hybrid Cloud PLM solution that brings you both Cloud capability and deep PLM expertise customised to your business environment. Built on Dassault Systèmes' best-in-class product development software applications, TECHNIA.Cloud ensures you get a high-quality and robust PLM solution.

Combining the best of On-premise and On-cloud, TECHNIA.Cloud gives you industry-leading PLM tools with TECHNIA's expert know how so that your PLM works harder for you. Not only do you gain added agility and flexibility in your preferred technology ecosystem, it also ensures you have visibility, control and traceability over your systems and processes so you can focus on driving new product innovation, without compromising security.

Why TECHNIA.Cloud?

- More flexible and simplified ways of working
- Tailored to your specific requirements
- Streamlined processes, increased transparency and agility
- Drive innovation with best in class tools
- Single source of truth during the product development process
- Increased productivity and product quality
- Reduced compliance risks with greater control over sensitive data

YOUR PLM, YOUR CHOICE:

3DEXPERIENCE Professional

Fit for purpose deployment

- Enhanced configurability
- Fast rollout
- Data portability
- Full application support
- Enhanced and supported by TECHNIA
- Integration capability
- Private Cloud

3DEXPERIENCE Platform

Run the full 3DEXPERIENCE platform on the Cloud

- Secure & scalable
- Grow instantly
- High availability
- Always up-to-date
- Deploy in minutes
- License flexibility

3DEXPERIENCE Enterprise

Complete customisation flexibility

Includes everything in professional plus:

- Best practice configurations
- Optional upgrades
- Managed by TECHNIA or customer

TECHNIA - MORE THAN JUST A PLM PARTNER

With over 30 years of expertise, TECHNIA has evolved so that every layer of the team comprises of specialists offering a 24/7 dedicated service to remove the obstacles stopping you reaching the full potential of your end-to-end PLM platform.

We partner with Dassault Systèmes' - the global leader in PLM - developing complementing add-ons to the 3DEXPERIENCE platform so you get a fully agile, customisable tool.
