

# Process Planner, Create Balanced Process Plans

## HIGHLIGHTS

- Manufacturing Process Planning for all Industries.
- Provides a 3D approach to define assembly and transformation steps of the product.
- Balance operations across the manufacturing system.
- Validate the process plan in the context of the 3D layout.

## USER VALUE

- Facilitate Process Planning definition and optimization with 3D visualization.
- Balance resource utilization across the production line.
- Detect issues early in the process plan using 3D validation.
- Capture and leverage best practices.
- Easily prepare and analyze manufacturing data with a dedicated application.
