HIGHLIGHTS

- Smart functions provide easy dress up and formatting of detailed work instructions.
- Author work instructions based on a configured engineering and manufacturing dataset.
- Include documents with instructions.
- Manage standard work instructions in catalogs.

USER VALUE

- Better work-instruction quality.
- Configured work instructions that support complex product and process scenarios.
- Reduced effort for work instruction authoring.
- 3D collaboration with all disciplines.
- Easily prepare and analyze manufacturing data with a dedicated application.
